Science Week is coming!

January 30 - February 3

Science Night: February 2, 7 - 8:30 p.m.

We study science all year, but Science Week is a special time to discover the excitement of science. All week, students will be participating in experiments at school. Each night, we invite you to continue the exploration at home. We'll send home a packet of ideas, or you can invent your own experiments, or check out some of the many experiments you'll find online.

We're delighted to have chemist Mark Jones returning this year to demonstrate some amazing science experiments and get students thinking about careers in science. Mark will run workshops with every team.

The highlight of Science Week is ***Science Night, Thursday, February 2, 7:00 - 8:30 p.m.*** On Science Night, you'll have a chance to share the excitement of science with your child. Hands-on science and STEM activities will be set up around the building. *We ask that parents stay with their students and join in the fun!*

Mark your calendar for an evening of exploration and fun!
